Subject: RE: Next Meeting Date

I spoke with Kathy Halbur last week and agreed that DNR would approve the VI investigation under PECFA with the hope that the work could be scoped out in the next month. The VI assessment should be straight forward and include both the hotel and the bait shop. I will work on setting up a date for a meeting in December. It would be helpful if we had as many of the analytical results as possible before the meeting. I will be meeting with Dave Larson from REI tomorrow on another site and will try to get a date when he expects to have the results back from the lab and then try to schedule a meeting.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Subject: Next Meeting Date

John,

I wanted to reach out to you and ask for a tentative date for our next meeting to discuss Haskell Lake/Tower Standard. Bob and I remembered discussing a date in February (maybe Feb. 15th) or so but wanted to see if we can move to have a discussion in December possibly before Christmas. This would be a follow-up to the Rhinelander meeting to discuss what we have found thus far (updates on wells and vapor intrusion screening). We should have enough data by

then to be able to plan next steps going forward. From a planning perspective, we need to have as much insight into WDNR/PECFA/REI work in order for EPA to line up our contractual support. We also know that you want us to coordinate with you to see if any of the work that we think is essential can be done by the WDNR/PECFA/REI process rather than outside of it. For that reason, and the fact that things tend to come up quickly at the site, we would like to meet sometime in December, if possible.

The main topic that I think has added a new wrinkle to the plans as last discussed in Rhinelander is the vapor intrusion work. We would like to work through a path forward on that much like we did for the groundwater monitoring wells that have now been installed and soon will be sampled.

Please let me know if you have any questions.
